Contributions should be sent to one of the editors:

G.J. HOYTINK
Editor of Chemical Physics Letters
Department of Chemistry
The University
Sheffield S3 7HF, England

L. JANSEN
Editor of Chemical Physics Letters
c/o Institut Battelle
7, route de Drize
CH-1227 Carouge-Geneva, Switzerland

or, preferably, to one of those members of the Advisory Editorial Board who is familiar with the research reported. Authors from the USA and Canada should clearly indicate on the envelope "First Class Mail" in order to prevent any possible delay in the mail. Instructions to authors are to be found on the last page of each volume.

Chemical Physics Letters is published semi-monthly. The subscription price per volume is Dfl. 155.00 (\$ 62.00) excluding Dfl. 12.00 (\$ 4.80) postage.

Subscriptions should be sent to the publisher: NORTH-HOLLAND PUBLISHING COMPANY, P.O. Box 211, Amsterdam, The Netherlands, or to any subscription agent or bookseller.

The average letter to be published should not exceed 2000 words (8 typewritten pages and two or three figures).

Particular attention will be given to:

- a) the originality of the research to be published;
- b) the desirability of speedy publication;
- c) the clarity of the presentation and the consistency of the conclusions derived.

The editors reserve the right to edit contributions, whenever necessary, and to refuse papers which in their opinion do not satisfy conditions as to standard or contents.

Colleagues working in the field who are preparing letters within the scope of the journal are cordially invited to submit them for publication.

Every paper submitted will be refereed.

Contributions should be sent to one of the editors or, *preferably, to one of those members of the advisory editorial board who is most familiar with the research reported.* The last procedure will speed up the publication considerably.

Manuscripts should be written in English. They should be submitted in three-fold, of which one is the type-written original, with a wide margin and ample spaces between the lines.

Letters should be provided with a short abstract in English not exceeding 40 words.

All references must be numbered, put at the end of the paper, and should contain the names and initials of all authors. References should not contain footnotes.

Figures should normally be lettered in such a way that they can be reduced to one-column width ($7\frac{1}{2}$ cm).

Figures should be sharp glossy prints of about manuscript size or, preferably, original drawings.

All correspondence with the editors or publishers should contain full reference to the paper concerned, i.e. the names of all the contributors, the full title, as well as the approximate date of submission. Contributors are reminded that, once their contribution has been accepted for publication, all further correspondence should be sent directly to the publishers and not to the editors. (Drs. L.J. Scheers, Editorial Department, North-Holland Publishing Company, P.O. Box 103, Amsterdam, The Netherlands.)

All proofreading will be done by the publishers; no proofs will be sent to the authors.

Publication scheme

Chemical Physics Letters will appear on the 1st and the 15th of each month.

Page charge and reprints

There will be *no* page charge. Reprints may be ordered from the publisher; an order form is sent to contributors upon acceptance of their communications.

Problems with Computer Programs?

WHY WASTE TIME AND MONEY DESIGNING AND TESTING YOUR OWN COMPUTER PROGRAM WHEN THE ONE YOU NEED MAY ALREADY BE AVAILABLE?

WE OFFER **2 POSSIBILITIES OF SOLVING YOUR PROBLEMS** IN COMPUTATIONAL PHYSICS AND COMPUTER PROGRAMS IN PHYSICS:

1. Computer Physics Communications

COMPUTER PHYSICS COMMUNICATIONS: the leading international journal publishing descriptions of computer programs in physics. It also publishes papers and letters on computational methods and the application of computers to physics, in the following areas: descriptions of numerical methods; descriptions of computer techniques; general descriptions of programs in a particular field of physics or quantum chemistry; general descriptions of methods or programs associated with the design, running or analysis of experiments; descriptions of program languages and system programs which are of particular importance to physicists or quantum chemists; comments on previous publications in CPC; review papers in the general field of computational physics; and comments on manufacturers' hardware and software.

2. The Program Library

Affiliated to Computer Physics Communications is the CPC Program Library. This Library is a non-profitmaking organisation which holds and distributes all the programs published in Computer Physics Communications. The library offers a dual service: a subscription scheme designed for laboratories and institutes who wish to receive regularly all the contributed programs, and a service to scientists who require particular programs relevant to their research. Full details are available from the program librarian: V.M. Burke, School of Physics and Applied Mathematics, The Queen's University of Belfast, Belfast BT7 INN, Northern Ireland.

Please write for full details on the journal. We will gladly mail you a free copy of the journal and the cumulative program index of Computer Physics Communications.
